Assessment on Recyclability according to CEPI vers. 3

Certificate

Customer: Salzer Papier GmbH; Stattersdorfer Hauptstrasse 53; 3100 St. Pölten, Austria

Date of testing: 2026-05-06 **Test No.:** PMV-26-103

Task

The material consisting of an uncoated board with grease barrier was derived directly from the customer and tested according to the standard CEPI version 3 (Feb. 2025) and evaluated according to 4evergreen evaluation protocol scorecard version 2.0 (Jan. 2025).

Test Material

Product type: Card Board, 250 g/m², bleached virgin fibres; unprinted and uncoated; equipped with a biopolymer-based grease barrier in the sheet, PFAS and plastic free

Product name: LipoPack prime ff

Results

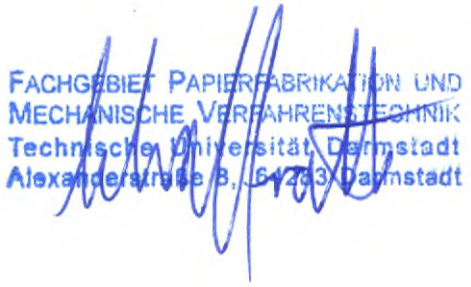
All results of the recyclability trials were documented in CEPI laboratory report template. The results obtained were:

- Evaporation residue : 13.52 mg/g packaging mass
- Chemical oxygen demand: 16.2 g(O_2)/kg (packaging mass)
- Biological oxygen demand (5 days): 7.26 g(O_2)/kg (packaging mass)
- Coarse reject: 0 %
- Fine reject: 0.05 %
- Yield, Y: 100.0 %
- Macrosticky area (Ø < 2000 µm): 0 mm²/kg
- Sheet adhesion: Level 1 (range: 1 – 3)
- Visual impurities: Level 1 (range: 1 – 4)

Based on the evaluation procedure (referring to 4evergreen evaluation scorecard Jan. 2025), the material is classified as:

Total Score: 99 (maximum 100)
=> Technically recyclable in a recycling mill with conventional process.

Darmstadt, May 20th, 2026



Dr.-Ing. Heinz Joachim Schaffrath
